

OneFix™ utilizes natural bacteria to digest suspended dead organics to help keep the pond balanced and the water crystal clear. OneFix™ is specifically designed to start working the second it hits the water. Use when water temperatures are above 50 °F.

Application Rates

1 fl oz / 30 mL	Treats up to 375 Gallons
2 fl oz / 60 mL	Treats up to 750 Gallons
4 fl oz / 120 mL	Treats up to 1,500 Gallons
8 fl oz / 240 mL	Treats up to 3,000 Gallons

SHAKE WELL BEFORE USE

POND SIZE CALCULATION: L x W x Avg. Depth x 7.5 = # of Gallons

Routine Application Rate: Apply OneFix™ every two weeks. For initial treatment of a new pond, double the application to seed your pond filter quickly.

Persistent Problem Application Rate: If a problem arises between routine applications apply OneFix™ at the prescribed rate every 3 days until pond becomes clear.

For Best Results: Apply OneFix™ directly into filter if possible or apply directly to the pond in an area of the greatest circulation. Optimal Water Conditions: pH: 6.5-8.5, Dissolved Oxygen: 5 PPM.

Product Notices: Do not use other chemicals while treating with this product. Failure to use as directed, or sudden changes in water conditions not consistent with label, may result in loss or injury to aquatic life. CrystalClear®, Inc. is not responsible for any loss of aquatic life.
