ALGAE CONTROL

For Koi Ponds, Waterfalls and Water Gardens

Fast-Acting Formula!

BioSafe Systems

Q & A

Q: Where can I use GreenClean?

A: GreenClean can be used in any water feature* such as koi ponds, fountains, pondless waterfalls, as well as under benches, on walkways, or patio furniture. (*use only in water features in CA)

Q: How does GreenClean work?

A: GreenClean works through powerful oxidation, breaking down algae cells on contact. You can actually see GreenClean working!

Q: Is GreenClean harmful to fish, birds, pets, or other aquatic life?

A: In concentrate form (the actual granules), GreenClean should not be fed to animals. When diluted and used as directed, GreenClean becomes non-harmful and organic.

Q: GreenClean is OMRI Listed, what is OMRI?

A: The Organic Materials Review Institute (OMRI) is a national organization that determines which products are allowed for use in organic production, processing, and handling.

Q: What sizes does GreenClean come in?

A: GreenClean is available in 1/2 , 1, 2, and 8 lb. containers as well as 20 and 50 lb. pails.

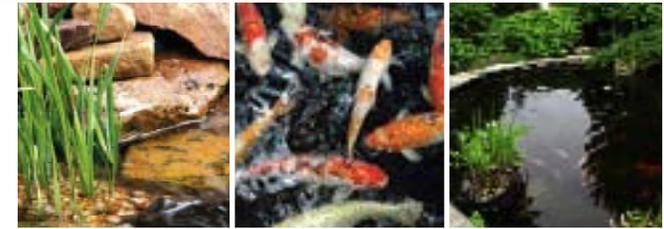

Q: Does GreenClean come in tablets?

A: BioSafe Systems has a full line of pond products including GreenClean Tablets, which are ideal for a maintenance program.

GreenClean® Granular Algaecide immediately kills algae blooms by breaking down algae cells while releasing oxygen into the water as it biodegrades.

GreenClean works on contact to control stubborn algae in water gardens, ornamental ponds, fountains, and other water features.

EASY-TO-USE DIRECTIONS

GREENCLEAN APPLICATION RATES		
Pond Size	Curative Rate	Low Curative Rate
50 gal	1 Tbsp	0.5 tsp
100 gal	1.5 Tbsp	1 tsp
500 gal	0.5 Cup	1.5 Tbsp
1,000 gal	1 Cup	3 Tbsp
5,000 gal	5 Cups	1 Cup
10,000 gal	10 Cups	2 Cups

Determining Water Volume:

Length(ft) x Width(ft) x Depth(ft) x 7.5 = Gallons

Directions for String Algae:

- Check pH levels before applying. pH level should be between 6.8 – 7.8.
- Apply early in the morning.
- Turn off circulation.
- Apply GreenClean to affected areas.
- Turn circulation back on after 10 – 20 minutes.

TIP: Skimming dead algae from the water's surface can help prevent further algae.
